

Institute always focuses on skill development of the student teachers every year to strengthen the field of teacher education as well as school education. Use of information communication technology in practice teaching at upper primary level to higher secondary level. This was the prier vision of the institute to foster students for ICT enabled teacher.

From the first year performing in acquiring various skills like micro-skills, simulation in teaching and practice teaching lessons student teachers are oriented to prepare ICT based lesson plans and presentation of the contain subject in their lesson delivered. Student teachers are guided by the all faculties for the use of ICT included in lesson plan and teaching.

In all subjects maximum student teachers taught with the use of ICT instruments. They prepare PowerPoint presentation and contain in MS Office format. They use websites and applications for use of video in the classroom. In practice teaching (stray-lessons, block teaching and internship) student teachers very frequently used LCD projectors for subject teaching. Institute always motivate student teachers to do practice of computer.
